Career Studies programs have increased with new program offerings in recent history. Certificate enrollments have dropped. After stabilizing, Unclassified enrollments declined, even with continued growth of dual enrollment students, though, with the decrease in enrollment, this percentage has risen again. A&S enrollments have had a general decline, though there has been a switch between A&S and AAS students in 2012-13 due to the effective elimination of "pre-health" programs, with those students largely being put into General Studies.

Average credit load is fall data only.

Part-time students accounted for nearly two-thirds of MECC's enrolled students throughout the college's history. The percentage had dropped, but has risen again due to increasing dual enrollment students.

<b>Total</b>	<b>17,960</b>	<b>6,415</b>	<b>36%</b>	<b>11,545</b>	<b>64%</b>

\*To be classified as off-campus, a student needs only take one off-campus course.

Consistently, one-third of students enroll in non-distance class(es) away from campus. Off-campus classes are being affected by students taking distance education classes, though dual enrollment classes combat the decrease.
